

SRG T-5 C4 (55,56,57 Chevy) Frame and Suspension Products

\$6,495

SRG T-5/C4 Perimeter frame with body mounts, core support mount, center K-member with port holes for exhaust, Fully fabricated and sculpted frame rails for nice flowing transitions and strength. All parts are CAD designed and CNC precision cut. Frame rails are fully enclosed and feature our exclusive inner structure trussing system inside the frame every 10 inches with a reversing angle brace between each vertical brace. The results in less frame flex which in return allows the suspension to do its work. Perimeter C4 frame also has all the important mounting points installed to mount the C4 suspension to. Has our narrowed front T5/C4 front cross member in front to correct track width for proper tire clearance in fender wells and our rear C4 cradle and 4-bar connection points installed.

Other Items you will need:

\$ 149

SRG Lower coil over mount kit
